NEW WIRELESS HANDHELD ULTRASOUND SCANNERS

The High Frequency Liner Probes works well for close to the surface tendons and small animal pregnancy with penetration of up to 55 mm. The Lower Frequency Convex U Probe will work best for abdominal organs such as liver, kidney, and heart with a penetration depth from 90 mm to 280 mm. The Wireless Ultrasound Scanners can be conveniently used in surgery and the problem of sterilization can be easily solved by using a disposable protective cover.

Features:

- 18 Month Warranty
- Built-in rechargeable and replaceable battery with 6 to 8 hours of battery life
- Advanced digital imaging technology
- Images Stored in Photo Gallery
- Comes with handy carrying case that attaches to your belt
- Measure: distance, area, obstetrics, and other

Handheld/Wireless Ultrasound Scanners
Available with Black and White or Color Doppler Convex & Linear Probes
UB probe-5N
All-in-One Wireless Connection
to phone or tablet
- Linear Probe
- 32 channel
- 128 crystals
- Harmonic function
- 10.0/14.0MHz
- Depth: 20-55mm

UB probe-5L
All-in-One Wireless Connection
to phone or tablet
- Convex Probe
- 32 channel
- 128 crystals
- Harmonic function
- 3.5/5.0MHz
- Depth: 90-280mm

UB probe-5C
All-in-One Wireless Connection
to phone or tablet
- Convex Probe
- 32 channel
- 128 crystals
- 3.5/5.0MHz
- Depth: 90-280mm

XP probe-5N
Built-in rotating screen
(not for use with phone or tablet)
- Linear Probe
- 32 channel
- 128 crystals
- Harmonic function
- 10.0/14.0MHz
- Depth: 20-55mm

CP probe-5L
All-in-One Wireless Connection
to phone or tablet
- Linear Probe
- 32 channel
- 128 crystals
- Harmonic function
- 7.5/10.0MHz
- Depth: 20-55mm
- Color Doppler

CP probe-5C
All-in-One Wireless Connection
to phone or tablet
- Convex Probe
- 32 channel
- 128 crystals
- 3.5/5.0MHz
- Depth: 90-280mm
- Color Doppler
